

## DL INFORMATION THRU REGISTRAR OF VOTERS

Submitted by Kristin Greenaway, AOC

April 13, 2011

1	Gail Shults - Inyo	We are still getting our D.M.V. information from the D.M.V. and our Voter's Registration list from Registrar of Voters
2	Therese Phelps – Plumas	The same as Inyo.
3	Diana Gifford Tuggle – Shasta	Obtains information directly from DMV. Our Voter's Registration list from the county does not always contain DMV information.
4	Stacy Warner - Trinity	The same as Inyo
5	Edwina Harper - Yolo	If the ROV has the driver license information they will provide it as part of the voter list, which JSI uses as an additional filter to aid in eliminating duplicate records in our database.
6	Bea Gin – San Joaquin	Same for San Joaquin
7	Dolores Curiel - Merced	We recently requested and received the Register of Voters file here in Merced. The file included DL numbers. Although that was provided, we continue to use the Register of Voters file along with DMV file for our Reload.
8	Rose Hamblin – Kings	The same as Merced
9	Elizabeth Renteria-Contra Costa	The same as Inyo
10	Carol Sharek – Tehema	We received our list from DMV and Voter Registration separately. Of those records, JSI will remove any duplicates if the name and address match. DMV requires full names whereas Voter Registration does not.
11	Deb Preston - Marin	We are receiving separate feeds from DMV and Registrar of Voters. Prior to loading all the data, JSI removes the duplicates.
12	Richard Goldner - Ventura	As Marin County Superior Court. (Upload from separate government entities, then merge and purge) CCP197(b)
13	Patty Baker – Georgia	Cherokee County, Georgia we receive 2 separate lists
14	Lupe Castaneda – Santa Clara	Same for Santa Clara County.
15	Shana Simpson - Sacramento	Same for Sacramento
16	Arlene Cervantes – Riverside	We were not aware of this. We are not currently requesting this information from the ROV. And just reviewed the load info up from the ROV and it does not include DL information. The one way it might benefit us is during the suppression process. If the ROV provided DL information, JSI could use the DL as a form of suppression, eliminating duplicates when the DOB is recorded incorrectly at the ROV. Since then we have contacted ROV and they will now be proving us this information
17	Sherry Spears – Fresno	We do have the DL information in the records we receive from Voter Registration; however, many records don't have the DL number because it wasn't required in the past.
18	Lynda Pierini – Madera	Currently receives data from both entities and it is forwarded to JSI for consolidation
